ABOUT VIDA

VIDA project aims to actively promote and support quality and innovation in youth work settings. VIDA hopes to empower a new cohort of informed young peer leaders to help mitigate the impacts of substance misuse on young people and communities.

VIDA has been funded with the support of the Erasmus+ Programme. The project is being developed by a team of five youth organisations from Finland, Czech Republic, Ireland, The Netherlands and Portugal as follows:

- YAD Youth Against Drugs (Finland)
- Future in Perspective (Ireland)
- Quarter Mediation (The Netherlands)
- Rightchallenge (Portugal)
- AKLUB Centrum Vzdělávání a Poradenství (Czech Republic)

WHAT DO WE WANT TO ACHIEVE?

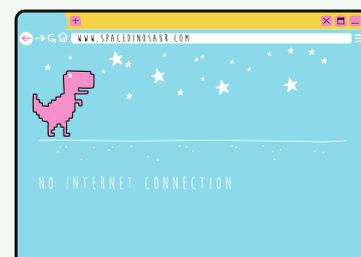

VIDA's project team is working on the development of a **Compendium of 12 Interactive Infographics** that aims to address drug awareness and the impact that drugs can have on young people's lives. Infographics are currently being finalised and will be available in all partner languages early next year, in May 2021.

We are also developing a tailor-made **In-Service Training Programme** for frontline youth workers that aims to build and improve their media skills to develop their own Interactive Infographics and to adapt their facilitation skills for youth group activities that can include the VIDA's Interactive Infographics. It be fully available in all partner languages in the summer of 2021.

A **Peer Leadership Training Programme** is starting to be developed to support youth leaders engaged in the challenging environment of combating substance abuse, providing them with innovative interactive materials in the real and virtual world where the infographics can extend their knowledge on key themes and reach young people. It will be fully available in November 2021.

Last (but not least)... We are working on the development of the **VIDA MOOC**, which will act as an online interactive portal that will host all online learning materials developed in 5 languages. It will be fully available in May 2022

Although the covid-19 pandemic hindered the first project meetings, **online communication** between the VIDA consortium **has been strong and steady**. We are hopeful that we can meet face-to-face in Czech Republic in summer of 2021.
